

# WW WEAVING THE WATERFRONT KINGSTON

## Live Well Kingston's Chess "Playground"

The goal of this project is to create a multi-generational chess "playground" to encourage play for all ages. Two chess tables and four benches will be installed at TR Gallo Park. Programming for monthly chess meet-ups will be developed in spring 2020.

The Health & Wellness Department, Play Well, and Age Well Focus Teams of the Live Well Kingston Commission collaborated to apply for and win an AARP Livable Communities Challenge Grant of \$11,224.

We envision people of all ages coming together to play chess in the City of Kingston's public park.

*This is an example of the Victor Stanley structures. Differently than this picture, this project will have two longer benches at each table with recycled plastic instead of wood.*

The Live Well Kingston Commission promotes the advancement of a healthy and active community by bringing partners and residents together to facilitate policy, environmental and systems changes.

This project was made possible for the community due to the generous support from AARP.

Funding for these projects has been provided by the New York State Department of State and the New York State Office of Parks, Recreation, and Historic Preservation under Title 11 and 9 of the Environmental Protection Fund, and by the New York State Department of Environmental Conservation, in cooperation with the New England Interstate Water Pollution Control Commission and Hudson River Estuary Program.
