

# HASBROUCK-DELAWARE PARKLET Design Proposal

RENDERINGS BY KaN Landscape Design

## PAST, PRESENT, FUTURE

The intention of the park design is to honor the heritage of Kingston's railways, while introducing contemporary elements and celebrating the natural beauty of the region. Linear forms, repurposed rails, and a train

depot-inspired shade structure are complemented by modern sculptures and paving with native pastoral plantings. This aesthetic will integrate Kingston's past, present and future for the enjoyment of residents and visitors alike.

## ALL TOGETHER NOW...

- Multi-use gathering space
- Trail node-access to Greenline
- Gateway to Kingston
- Public art space
- Host site for environmental & community programming
- Stormwater retention
- Pollinator habitat
- Viewing area of Kingston Greenline
